

Calvin Maighan

Senior Web Developer. Prototypes to production.

Montreal, Canada 🇨🇦 | hello@calvinmaighan.dev | calvinmaighan.dev | [LinkedIn](#)

SUMMARY

I am a senior web developer with 10+ years of building frontier software. My focus is design, UX, and Frontend, but I can get the job done on the backend as well. I rapidly prototype and build automation systems, and obsess over code quality controls and refactoring after each new iteration. I've trained more than 10 engineers personally from junior to senior, and am very patient with anyone willing to learn.

SERVICES

- **Web Application Audit.** I review your product, codebase, architecture, infrastructure, and development workflows, then deliver a technical plan, risk assessment, and prioritized build roadmap.
- **Production Build.** I shape the architecture and product foundations from the outset, define scope, plan resources, and lead focused sprints through to production.
- **Embedded Senior Engineering.** I work alongside your team on a set number of days per week, providing senior full-stack TypeScript expertise across frontend, backend, APIs, infrastructure, performance, and code quality.

WORK EXPERIENCE

Founder, Deedee.run (2026 - present)

- Private AI workspace to automate business operations, accounting, legal, marketing

CVO, Ladder Labs (2022 - 2026)

- Laddercaster, Buddy Link, Sugar Quest
- Product ideation, design, implementation, and developer management
- Web3 Gaming and Referral protocol

STACK

AI: Cursor, Claude, Codex, Pi, agent workflows, OCR, structured extraction, evaluation, observability, cost control

Frontend: TypeScript, Nextjs, React, Htmx, Emotionjs

Backend: APIs, PostgreSQL, queues, caching, websockets, webRTC, GraphQL, s3, Auth

Infrastructure: AWS, Google Vertex, Sevalla, Supabase, Depot CI/CD, Docker, WorkOS, Resend

OPEN SOURCE

- [active-state](#). Keyed pub/sub store for global client UI state.
- [active-theme](#). Mode and accent color tokens driven for custom themes.
- [active-i18n](#). Locale and dictionary runtime with persisted language.
- [active-jsx](#). React alternative for more efficient web development.

EDUCATION

Concordia JMSB, Finance, last-year drop-out to start a business, 2014-2017
